The online training tools are designed to teach you the everyday skills of reading and responding to micro expressions, whereas the FACS manual is a much more technical guide often used by researchers, animators, and in other various professional settings. Micro Expressions Intensive Training Tool is an expanded version of the Micro Expressions front-view training. During that time, you are granted unlimited use of the tools in that package. This training is appropriate for those whose work requires them to evaluate truthfulness and detect deception, such as police and security personnel, as well as those in sales, education, and medical professions. 30 days before your tools are set to expire, you will receive an email from us asking if you would like to renew your tools at a discounted price. All of our tools feature English, Spanish and Portuguese caption capabilities. In addition, those working in surveillance can greatly benefit from this training. Therefore, for anyone interested in learning about micro expressions, we generally recommend starting with the training tools on this page. For our online training tools and FACS, we accept payment in the form of PayPal or credit card. These small movements may also occur when an emotion is just beginning, often before the person is aware of their emotional state. You can learn FACS the traditional, self-guided way, or through a workshop. Micro expressions expose a person's true emotions, so training helps people increase their emotional awareness as well as detect when someone is lying. Our training tools are exclusively online and therefore there is nothing to download or to be shipped. All users will be prompted at the beginning of the trainings to choose a language. There are a total of seven training tools which are combined into three different packages. The tools are all web-based applications using a combination of text, photos, videos, and auditory input. All users will be prompted at the beginning of the trainings to choose a language. Asac a tnassert inoizautis ni eragivan a arapl. orcim inoissrporcim eravelir rep.
